

Component	Technical specifications		Operation
Coolant fluid temperature sensor			NTC sensor connected to a 5V circuit. It is composed of two electrically different sections. Fitted to engine head, it provides performance data for digital instrument and for injection.
	RESISTANCE	TEMPERATURE	
	9.6KΩ	-10° C	
	5.975KΩ	0	
	3.81 KΩ	+ 10° C	
	2.5KΩ	+20° C	
	1.68KΩ	+30° C	
	0.3KΩ	+80° C
